PRODUCT

PAC DOSING

PAC (Polyaluminium Chloride) is a cost effective and efficient method of ensuring superb water quality and protecting swimming pools from the threat of Cryptosporidium.

PAC Dosing Systems are a safe and accurate way of ensuring that the correct amounts of PAC are added to the pool, minimising both aluminium levels and chemical usage.

Please call for information.

hth TABLET FEEDERS

A range of safe, practical and economic feeders, suitable for all pools.

The benefits include:-

Produces chlorine only on demand.

Only small area required in the Plant Room.

No Bund requirement.

Consistent strength of chlorine.

Safer to handle (tablets).

No Dosing Pump required.

No Agitator required.

No Injector required.

hth CONTROLLERS

The hth Professional Controller is suitable for use in any sized swimming pool, and will accurately control chlorine and pH levels.

The use of advanced colorimetry technology to measure free chlorine is the same method trusted and used everyday by millions of pool managers world-wide.

The benefits include:-

- * Accurate analysis is not affected by variations of the pH.
- * Accuracy is not affected by the quality of the water.
- * Probes are not eroded by constant cleaning.
- * System does not require frequent calibration.
- * Rapid process of readings.
- * Chlorine and pH displayed and requires no conversion.

Terms & Conditions / Services Information

INVOICES

Terms : 20th of month following month of invoice.
All prices are exclusive of VAT and apply from 1st February 2011.

CARRIAGE CHARGES

Carriage is paid on all orders to one address within the UK mainland over **£500.00** (excluding VAT)
NOTE : Carriage will be applied to all dosing, control and equipment orders. All haulage charges will be determined by the weight of the consignment, and if outside hauliers are used, qualified ADR drivers will be used where applicable.

ENVIRONMENTAL CHARGE

January 1st 1998 saw the introduction of Waste Packaging Regulations. This is a legal requirement involving accountability for (and payment for) waste plastic, paper etc., which as a consequence has forced us to implement an Environmental Charge. This charge may be subject to change.

MINIMUM ORDER CHARGE

A minimum order value for chemicals of **£100** (excluding VAT) will apply to each individual order placed, unless otherwise agreed.
A minimum order value for test kits and tablets of **£50.00** (excluding VAT) will apply unless otherwise agreed.

RETURN OF GOODS

All customers with goods to return should, in the first instance, contact our Sales Department. No goods may be returned without permission.

CONTAINER RETURNS

It is essential that any containers collected are nominally empty, contain only residues of the product originally supplied in them, and that their closures have been securely fastened.

HAZARDOUS WASTE

We will not collect or dispose of hazardous waste. Customers with such waste should contact a registered company licensed to dispose of such material.

CONDITIONS OF SALE

All products are sold subject to our Conditions of Sale, a copy of which is attached.

Benefits of changing to hth

- * ENERGY SAVING Contains much less salt than other chemicals, therefore reduce costly dilution, and TDS isn't a problem.
- * REDUCED CHEMICALS hth has a pH of 9 which means much less use of pH correction chemicals.
- * CORROSION TDS isn't a problem, so this major cause of corrosion is eradicated.
- * GROUT LOSS Water leaches calcium from grout, and many pool operators find they need to add Calcium Chloride Flake separately. hth is 68% available Calcium Hypochlorite, so no more calcium flake needs to be added.
